Awarded 6 CPD points subject to peer review

Transforming lives together

Transforming Care: Transforming Lives Developing realistic care pathways

St Andrew's Northampton

Wednesday 29 November 2017

In challenging environments how do we, as Mental Health Care providers, move people through the care pathway and in to the community?

People with Learning Disabilities /Autism Spectrum Disorder pose challenges to our services and we need to change and innovate to meet their complex mental health and ASD / LD needs as they move to the community.

What do we need to think about?

- Adapting environments for LD/ASD patients by recognising their sensory needs
- Providing vocational opportunities
- Working with patients to co-produce care plans
- Providing Psychological Behavioural Support
- Understanding the environments that people need
- Having expert knowledge about the clinical needs of these individuals
- Structural considerations: Health Economics and the relationships between providers, CCGs and the NHS.

This one day event will focus on **innovating thinking** and **idea sharing** about how to move people **from inpatient to community care**; maintaining and improving quality of life, whilst recognising the reality of budget constraints.

We will have a number of **presentations** and **workshops** from experts in the field as well as patients and carers telling their own stories in their own words. This will allow us to consider pathways, interventions, therapies and innovation.

This event allows you to take a day away from your usual practice to think and talk about how we take transforming care forwards to improve patient lives.

Come along to listen, engage, share and learn.

Conference aims and objectives:

- To get the Mental Health Care industry talking about Transforming Care and its challenges
- To provoke thoughts on innovation and change within LD/ASD services
- To discuss and share ways to improve the quality of life for people living with LD/ASD

This conference will provide:

• A range of keynotes, workshops, research, exhibits and posters to enable creative thinking and idea sharing from those who work within the Mental Health Care industry around the country.

Who will benefit from attending:

Anyone, from any profession, who works in Mental Health Care Services with patients with LD or ASD.

Follow the conversation on twitter: #TransformingLives

Early bird delegate fee £79.00 on or before 3 November 2017

Standard delegate fee £99.00 after 3 November 2017
