

3RD INTERNATIONAL MORAL INJURY IN OCCUPATIONAL SETTINGS CONFERENCE: "RECONNECTION AND REPAIR" ONLINE CONFERENCE 9TH MAY 2023

The growing awareness of the importance of moral injury as a framework to describe clinician distress also offers healthcare services potential solutions and interventions to improve the wellbeing of workforces. Equally, as recognition that services themselves play a key role in determining the wellbeing of healthcare workers it is imperative that responses to moral injury have a systemic focus. #MI2023 brings together transatlantic experts to offer a comprehensive programme focused on sharing systemic and organisational solutions to preventing, mitigating and managing moral injury in healthcare and first responder settings.

Dr Anne McKechnie, CPsychol
Consultant Psychologist
