

Neurodiverse populations are significantly more likely to be exposed to trauma and adversity across the lifespan, yet they are significantly under represented in trauma frameworks, services and innovations. This event brings together national and international experts to offer a clinically focused programme to inform our understanding of the trauma needs and treatment approaches for this population. This focus, as well as presentations describing innovations in the trauma field will be of particular use to clinicians and applied researchers. #TNDP2022

TRAUMA & NEURODIVERSE POPULATIONS EVIDENCE AND INNOVATIONS

ONLINE CONFERENCE 6TH DECEMBER 2022

3 PRACTICE FOCUSED SYMPOSIA

ROUND TABLE DISCUSSION

Opening
Conference address

Round table:
Medication and trauma

Assessment and treatment: Approaches and their evidence

Dr Indermeet Sawhney
Consultant Psychiatrist & Clinical
Director, Hertfordshire Partnership
University NHS Foundation Trust,
Chair, Intellectual Disability Faculty,
Royal College of Psychiatry

Professor Regi Alexander
President, Intellectual Disability
Forum, Royal Society of Medicine
Associate Dean, RCP,
Visiting Professor, University of
Hertfordshire
